

Beaded Seahorse

What you need:

- 1) Size 11/0 glass seed beads
{including two black 4mm bicone for the eyes}
using
colour combinations of choice)
Mine: Gold, Champagne and Silver
White.
- 2) Beading string (0.25mm).

Step Cut a piece of beading string around
1: one meter long.

- Add four gold seed beads at the centre of the string and crisscross the string through the last added bead to form a crystal circle as shown.

BeadJewelryMaking.com

Note: This four beads will be at the top of the seahorse's head and where you would add four strands of hair fillers on later.

Step Continue to:

2:

- Add four gold beads on the left (black) string and crisscross the other (red) string through the last bead added in this step (shown where the string crisscrossed).

BeadJewelryMaking.com

Step Continue to:

3:

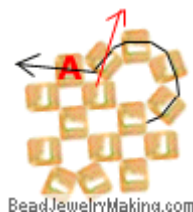

- Add three gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) up through one old bead from step 1 marked **A**.

Step Continue to:

4:

- Add four gold beads on the right (black) string and crisscross the top left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead from step 1 marked **A**.

Step Continue to:

5:

- Add three gold beads on the right (red) string and crisscross the left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) down through one old bead from step 1 marked **A**.

Step Continue to:

6:

- Add four gold beads on the top (black) string and crisscross the top bottom (red)

string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) through one old bead from step 2 marked **A**.

Step Continue to:

7:

- Add two gold beads on the top left (red) string and crisscross the bottom right (black) string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) down through one old bead from step 2 marked **A**.

Step Continue to:

8:

- Add one gold, one white and two gold beads on the left (black) string and crisscross the right (red) string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) through two old beads from step 2 and 3 marked **A** and **B**.

Step Continue to:

9:

- Add one gold, one white and one gold beads on the bottom left (red) string and crisscross the top right (black)

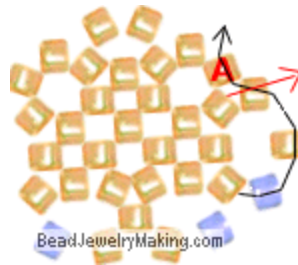

string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) through two old beads from step 3 and 4 marked **A** and **B**.

Step Continue to:

10:

- Add one white and two gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through one old bead from step 4 marked **A**.

Step Continue to:

11:

- Add two gold beads on the bottom right (red) string and crisscross the top left (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through two old beads from step 4 and 5 marked **A** and **B**.

Step Continue to: (bead the right ear)

11A:

- Using only one side of the string (black)
Add four gold beads (I have used darker colored bead in the picture illustration for better view) on the right (black) string

and continue to pass this string back up through the same bead it exited from before adding the four new beads.

Step Continue to:

12:

- Add three gold beads on the right (black) string and crisscross the left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads from step 5 and 6 marked **A** and **B**.

Step Continue to:

13:

- Add three gold beads on the top right (red) string and crisscross the bottom left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) up through one old bead from step 6 marked **A**.

Step Continue to: (bead the left ear)

13a:

- Using only one side of the string (black) Add four gold beads (I have used darker colored bead in the picture illustration for better

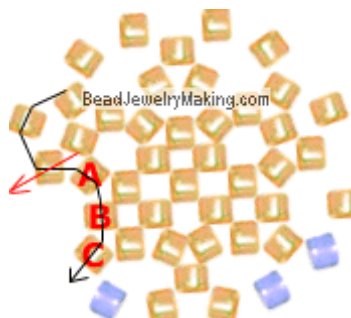

view) on the top (black) string and continue to pass this string back up through the same bead it exited from before adding the four new beads.

Step Continue to:

14:

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) through three old beads from step 6, 7 and 8 marked **A**, **B** and **C**.

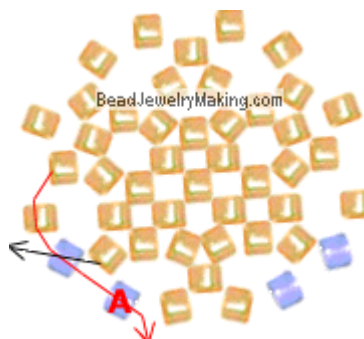

Step Continue to:

15:

- Add one gold and one white beads on the top (red) string and crisscross the bottom (black) string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) through one old bead from step 8 marked **A**.

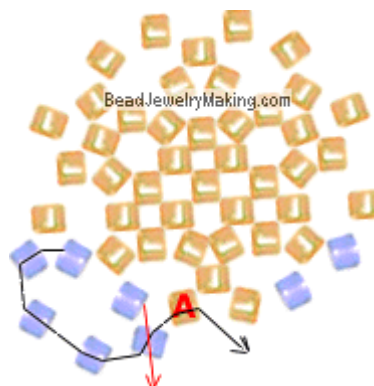

Step Continue to:

16:

- Add four white beads on the left (black) string and crisscross the right (red) string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) down through one old bead from step

8 marked **A**.

Step Continue to: (bead the left eye)

17:

- Using only one side of the string (red)
Add one black 4mm crystal on the bottom (red) string and continue to pass this string back up through three old white beads as shown, exiting from the same bead you started off with.

Step Continue to:

18:

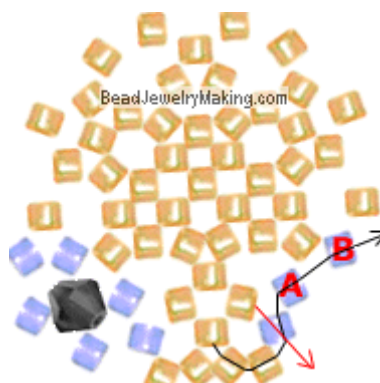

- Add three gold beads on the bottom left (red) string and crisscross the top right (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) down through one old bead from step 9 marked **A**.

Step Continue to:

19:

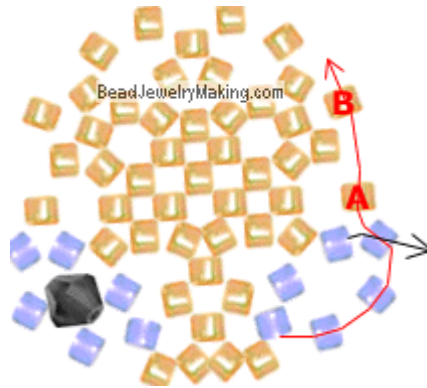

- Add two gold and one white beads on the bottom left (black) string and crisscross the top right (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through two old beads from step 9 and 10 marked **A** and **B**.

Step Continue to:

20:

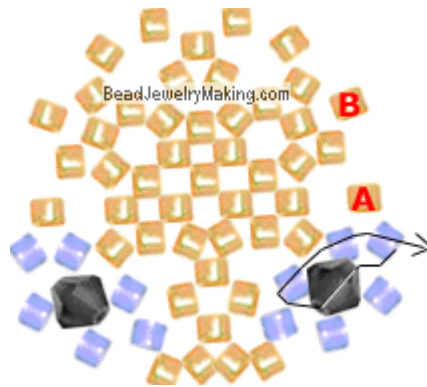

- Add three white beads on the bottom left (red) string and crisscross the top right (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through two old beads from step 10 and 11 marked **A** and **B**.

Step Continue to: (bead the right eye)

21:

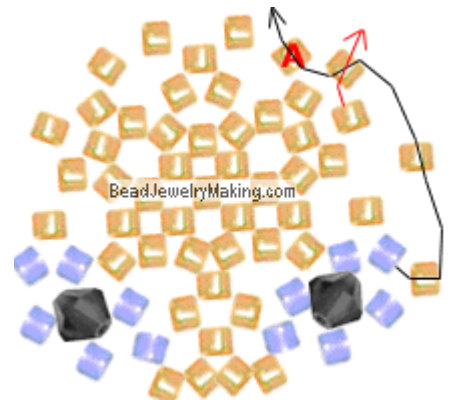

- Using only one side of the string (black)
Add one black 4mm crystal on the bottom (black) string and continue to pass this string back up through three old white beads as shown, exiting from the same bead you started off with.

Step Continue to:

22:

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through one old bead from step 12 marked **A**.

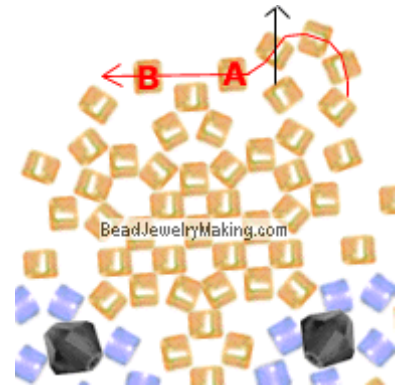

Step 23: Continue to: (bead the bottom right ear)

- Using only one side of the string (red)
Add three gold beads (I have used darker colored bead in the picture illustration for better view) on the right (red) string and continue to pass this string back up through the same bead it exited from before adding the three new beads.

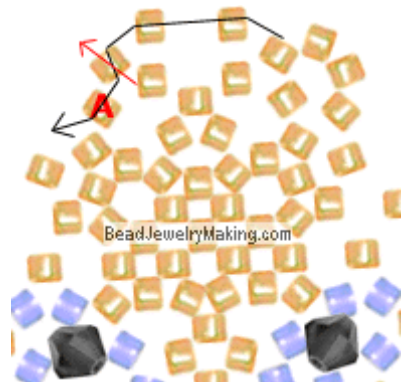

Step 24: Continue to:

- Add three gold beads on the right (red) string and crisscross the left (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through two old beads from step 12 and 13 marked **A** and **B**.

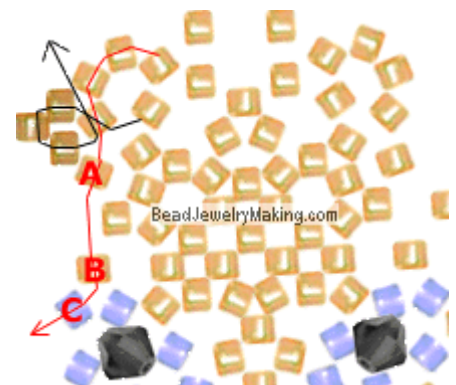

Step 25: Continue to:

- Add three gold beads on the right (black) string and crisscross the left (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through one old bead from step 13 marked **A**.

Step 26: Continue to:

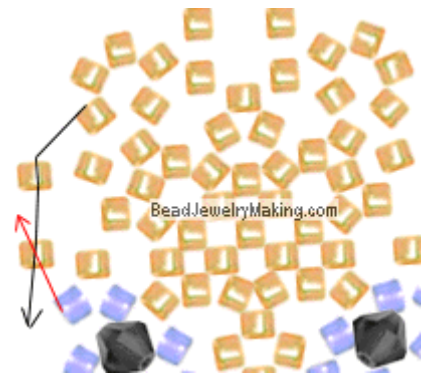

- Add three gold beads on the top (red) string and crisscross the bottom (black) string through the last added bead.
Continue to pass the red string (the one you used to add new beads on this step) through three old beads from step 14, 15 and 16 marked **A**, **B** and **C**.
Continue to add three gold beads (I marked with darker color that represents the lower left ear) on the top (black) string and pass

the same string back up the bead that it came out from.

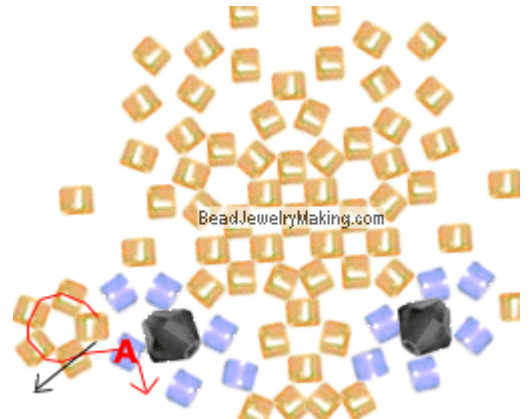

Step 27: Continue to:

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added.

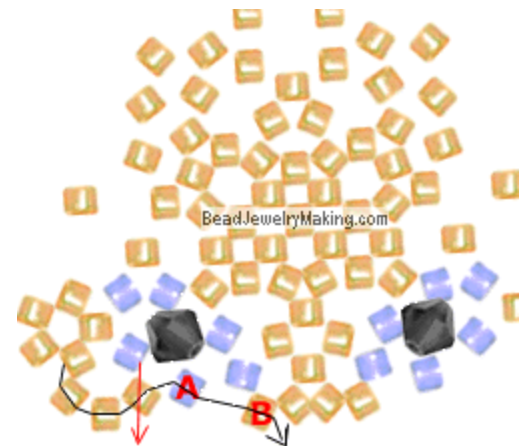

Step 28: Continue to:

- Add four gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) down through one old bead from step 16 marked **A**.

Step 29: Continue to:

- Add three gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) down through two old beads from step 16 and 17 marked **A** and **B**.

Step 30: Continue to:

- Add three gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads from step 17 and 18 marked **A** and **B**.

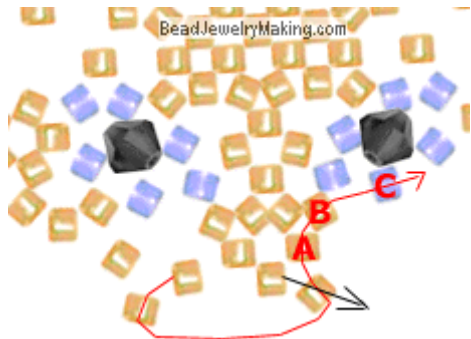

Step 31: Continue to: (work clockwise on this step - the opposite direction you had been working with so far)

- Add two gold beads on the top right (red) string and crisscross the bottom left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead from step 30 marked **A**.

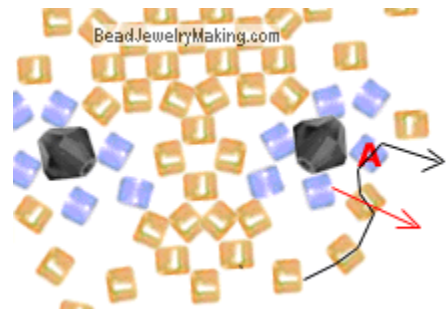

Step 32: Continue to: (go back to beading anti-clockwise)

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through three old beads from step 31, 19 and 20 marked **A, B and C**.

Step 33: Continue to:

- Add two gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead from step 20 marked **A**.

Step 34: Continue to:

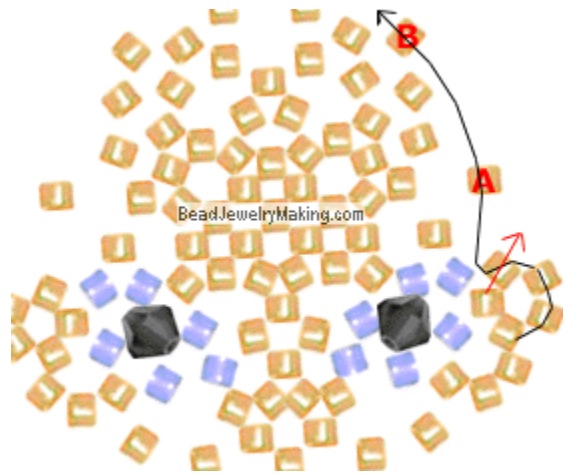

- Add three gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) up through one old bead from step 22 marked **A**.

Step Continue to:

35:

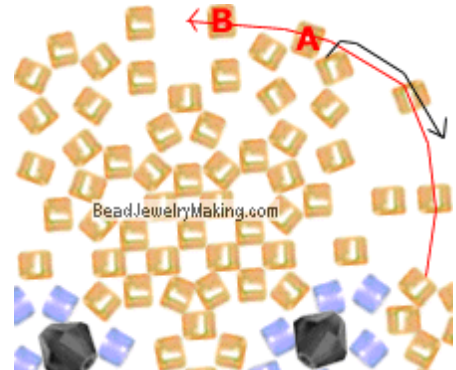

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads from step 22 and 24 marked **A** and **B**.

Step Continue to:

36:

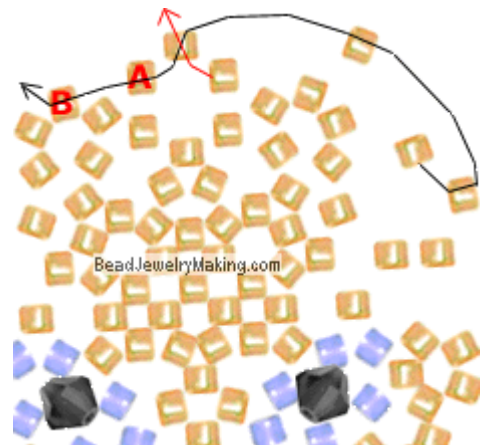

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) two old beads from step 24 and 25 marked **A** and **B**.

Step Continue to:

37:

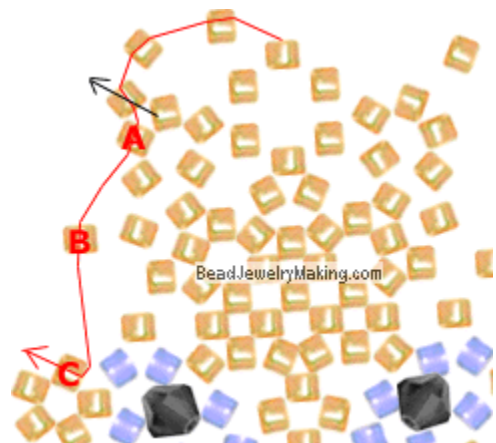

- Add three gold beads on the right (black) string and crisscross the left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) down through two old beads from step 25 and 26 marked **A** and **B**.

Step Continue to:

38:

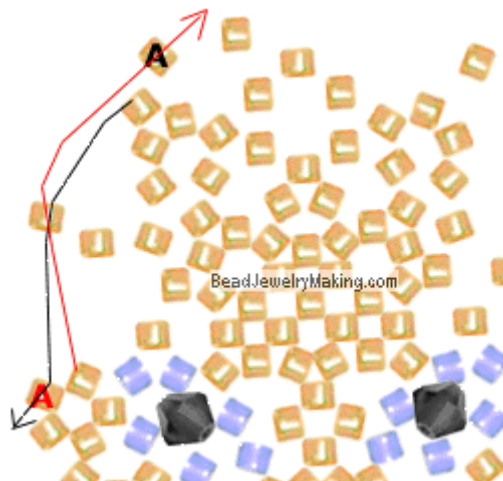

- Add three gold beads on the right (red) string and crisscross the left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through three old beads marked **A**, **B** and **C**.

Step Continue to:

39:

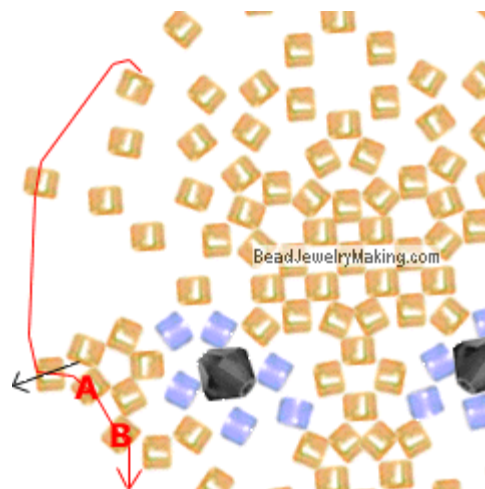

- Add one gold bead on the top (black) string and crisscross the bottom (red) string through the bead added. Continue to pass the black string (the one you used to add new beads on this step) down through one old bead marked **A**. Continue to pass the other string (red) up through one old bead marked **A**.

Step Continue to:

40:

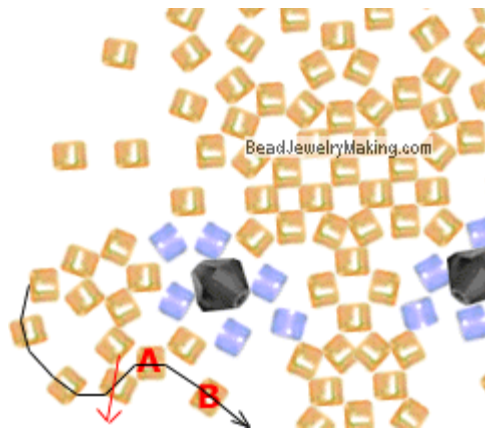

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) down through two old beads marked **A** and **B**.

Step Continue to:

41:

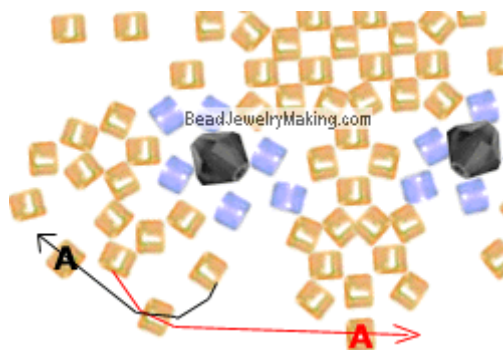

- Add three gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

42:

- Add one gold bead on the left (red) string and crisscross the right (black) string through the bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**. Continue to pass the other string (black) up through one old bead from step 41

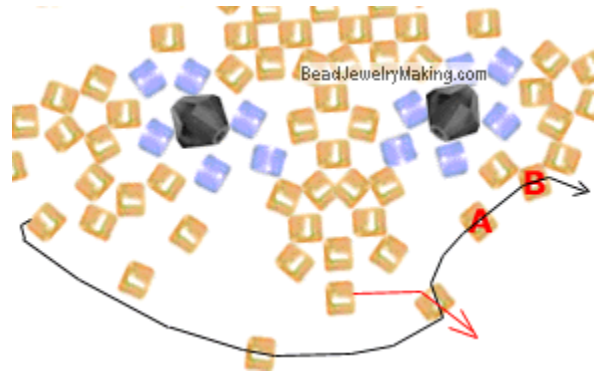

marked **A**.

Step Continue to:

43:

- Add two gold beads on the left (black) string and crisscross the right (red) string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

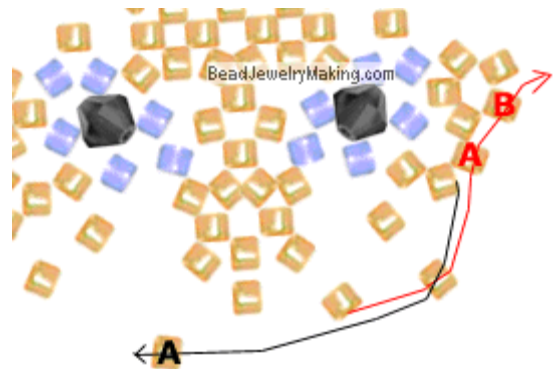

Step Continue to:

44:

- Add one gold bead on the bottom left (red) string and crisscross the top right (black) string through the last bead added.

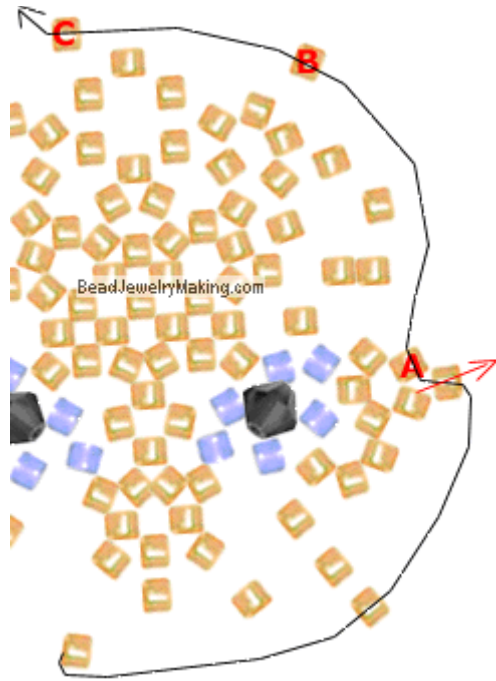

Continue to pass the red string (the one you used to add new beads on this step) up through two old beads marked **A** and **B**. Continue to pass the other black string down through one old bead marked **A**.

Step Continue to:

45:

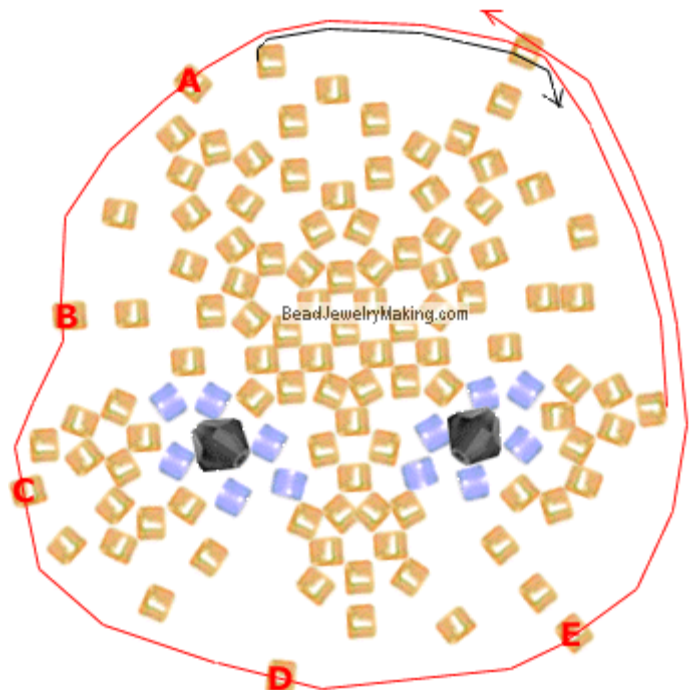

- Add two gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through three old beads marked **A**, **B** and **C**.

Step Continue to:

46:

- Add one gold bead on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) 5 old beads marked **A**, **B**, **C**, **D** and **E**. Continue to pass the same string back up the new bead you just added on this step.
- Now you should have the head done (without the mouth - which you will add on at a later stage). Note you should be left with a 6 beads circle like this:

Step Continue to: (Do not cut or tie the

47: threads as per last step - continue to bead the body from there)

- Add three gold beads on the right (black) string and crisscross the left (red) string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) down through one old bead marked **A**.

Step Continue to:

48:

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) down through one old bead marked **A**.

Step Continue to:

49:

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) down through one old bead marked **A**.

Step Continue to:

50:

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) through one

old bead marked **A**.

Step Continue to:

51:

- Add two gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

52:

- Add one gold bead to crisscross both strings through.

Step Continue to:

53:

- Add four gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:

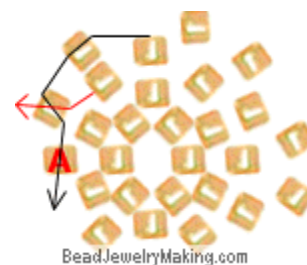

54:

- Add three gold beads on the right (red) string and crisscross the left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 55: Continue to:

- Add two gold beads on the top right (black) string and crisscross the bottom left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 56: Continue to:

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 57: Continue to:

- Add three gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) down through two old beads marked **A** and **B**.

Step 58: Continue to:

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added.

Step 59: Continue to:

- Add four gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) down

through one old bead marked **A**.

Step 60: Continue to:

- Add three gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through old beads marked **A** and **B**.

Step 61: Continue to:

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 62: Continue to: (use only one side of the string in this step)

- Take the right (red) string, pass it backwards through one old bead marked **A**. Add one gold bead on this same string. Continue to pass the same string up through one more old bead marked **B** and further up the same bead you started off with in this step. The new bead added on this step should be sitting in the middle of the bead circle from step 61.

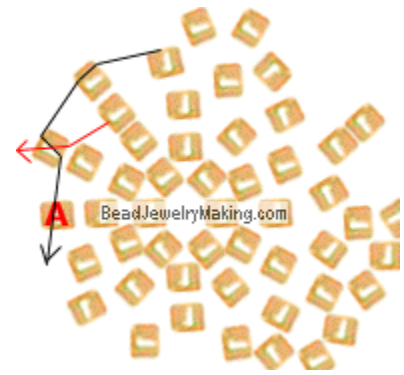

Step 63: Continue to:

- Add three gold beads on the right (red) string and crisscross the left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

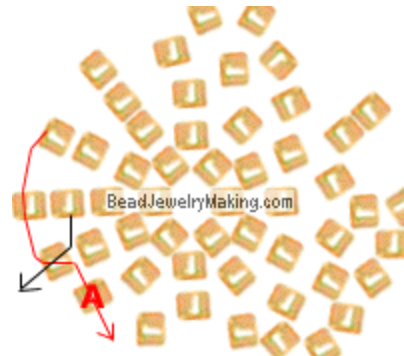

Step 64: Continue to:

- Add two gold beads on the top right (black) string and crisscross the bottom left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

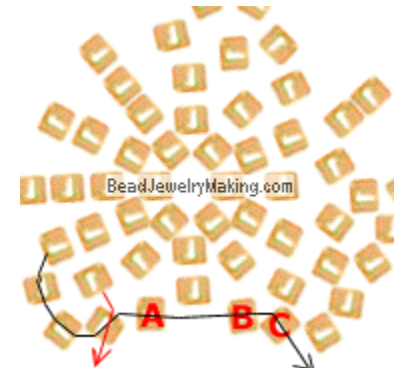

Step 65: Continue to:

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

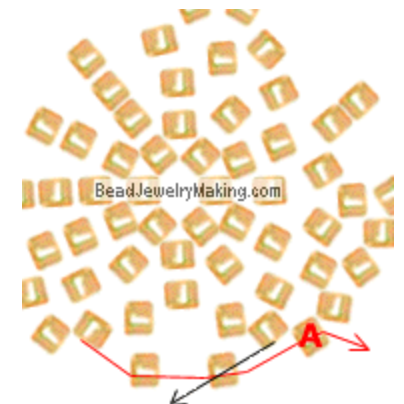

Step 66: Continue to:

- Add three gold beads on the top left (black) string and crisscross the bottom right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through three old beads marked **A**, **B** and **C**.

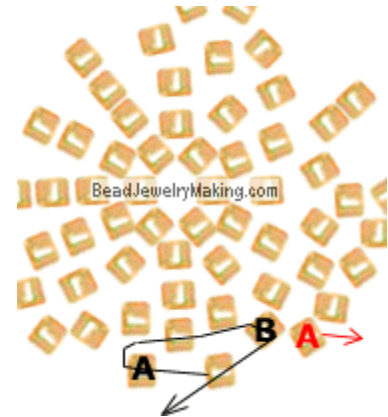

Step 67: Continue to:

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

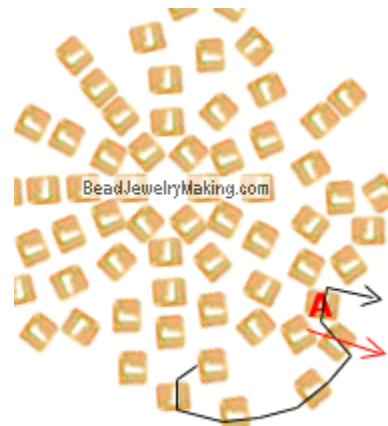

Step 68: Continue to: (use only one side of the string in this step)

- Take the left (black) string, pass it backwards through one old bead marked **A**.
Add one gold bead on this same string.
Continue to pass the same string through one more old bead marked **B** and further down the same bead you started off with in this step.
The new bead added on this step should be sitting in the middle of the bead circle from step 67.

Step 69: Continue to:

- Add four gold beads on the left (black) string and crisscross the right (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

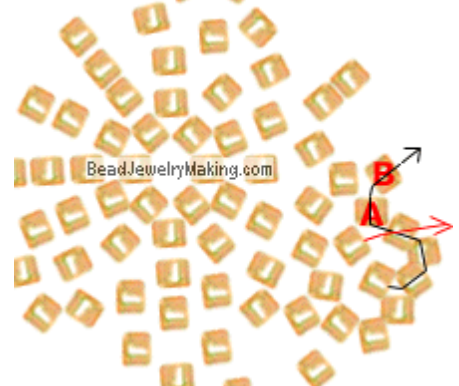

Step 70: Continue to:

- Add three gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 71: Continue to:

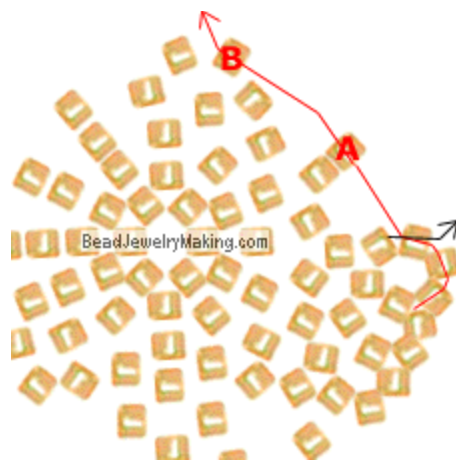

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

72:

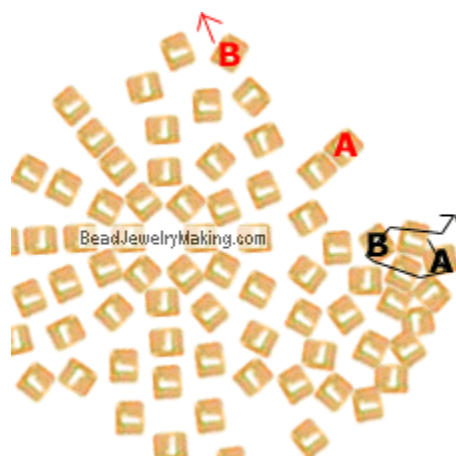

- Add three gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to: (use only one side of the string in this

73: step)

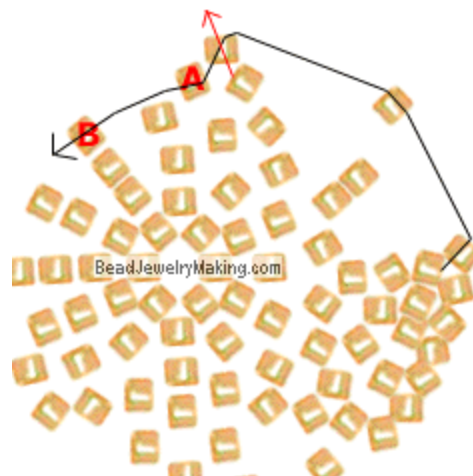

- Take the bottom (black) string, pass it backwards through one old bead marked **A**. Add one gold bead on this same string. Continue to pass the same string up through one more old bead marked **B** and further up the same bead you started off with in this step. The new bead added on this step should be sitting in the middle of the bead circle from step 72.

Step Continue to:

74:

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

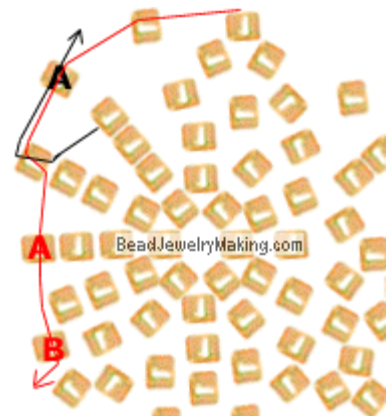

Step 75: Continue to: (use only one side of the string in this step)

- Take the right (red) string, pass it backwards through one old bead marked **A**. Add one gold bead on this same string. Continue to pass the same string up through one more old bead marked **B** and further up the same bead you started off with in this step. The new bead added on this step should be sitting in the middle of the bead circle from step 74.

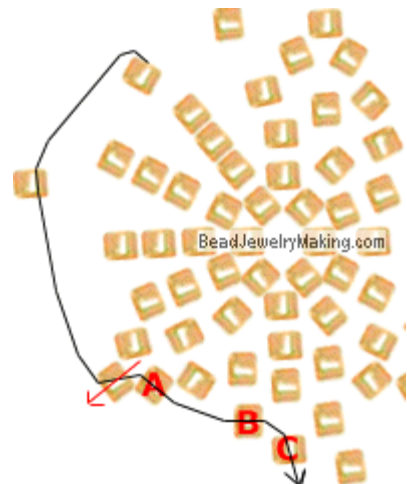

Step 76: Continue to:

- Add three gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**. Continue to pass the other (black) string back up through one bead marked **A** (which is the second new bead added on this step).

Step 77: Continue to:

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through three old beads marked **A**, **B** and **C**.

Step Continue to:

78:

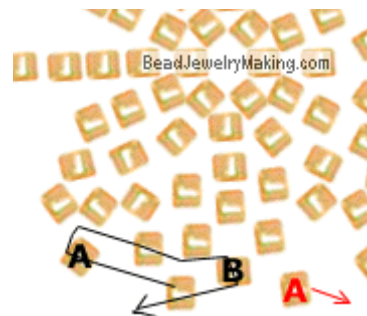

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to: (use only one side of the string in this step)

79:

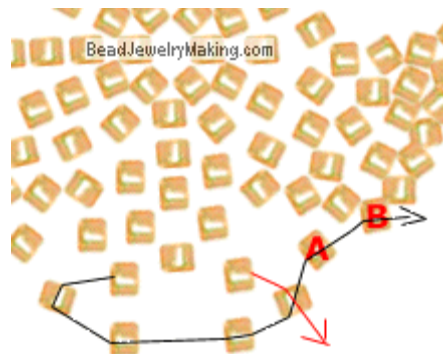

- Take the left (black) string, pass it backwards through one old bead marked **A**. Add one gold bead on this same string. Continue to pass the same string through one more old bead marked **B** and further down the same bead you started off with in this step. The new bead added on this step should be sitting in the middle of the bead circle from step 78.

Step Continue to:

80:

- Add four gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to: (use only one side of the string in this step)

81:

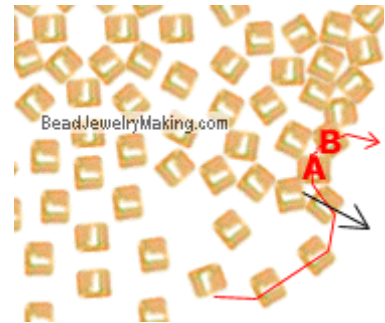

- Take the left (red) string, pass it backwards through one old bead marked **A**. Add one gold bead on this same string. Continue to pass the same string through one more old bead marked **B** and further down the same bead you started off with in this step.

The new bead added on this step should be sitting in the middle of the bead circle from step 80.

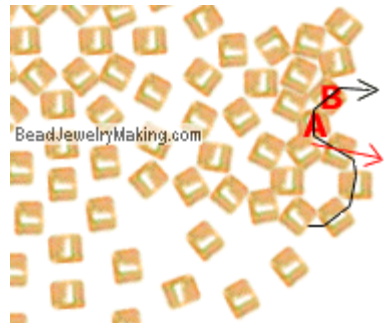

Step 82: Continue to:

- Add three gold beads on the bottom left (red) string and crisscross the top right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step 83: Continue to:

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step 84: Continue to: (use only one side of the string in this step)

- Take the bottom (red) string, pass it backwards through one old bead marked **A**. Add one gold bead on this same string. Continue to pass the same string up through one more old bead marked **B** and further up the same bead you started off with in this step. The new bead added on this step should be sitting in the middle of the bead circle from step 83.

Step Continue to:

85:

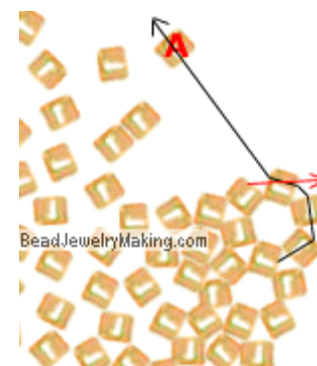

- Add three gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

86:

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to: (use only one side of the string in this step)

87:

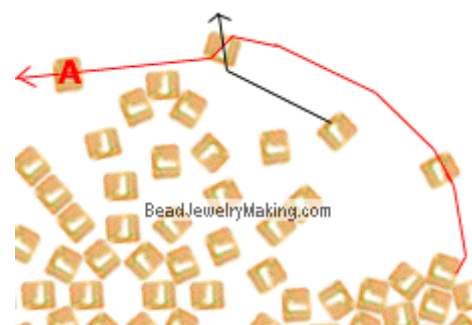

- Take the bottom (red) string, pass it backwards through one old bead marked **A**. Add one gold bead on this same string. Continue to pass the same string up through one more old bead marked **B** and further up the same bead you started off with in this step. The new bead added on this step should be sitting in the middle of the bead circle from step 86.

Step Continue to:

88:

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:

89:

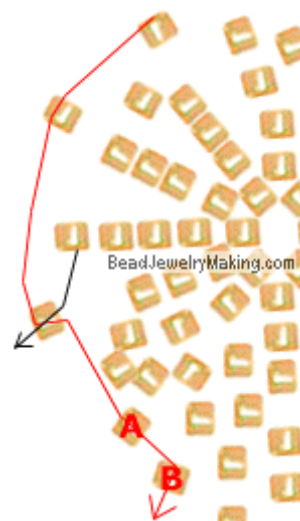

- Add two gold beads on the top right (black) string and crisscross the bottom left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:

90:

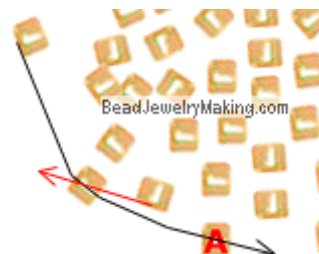

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

91:

- Add one gold bead on the top left (black) string and crisscross the bottom right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:

92:

- Add four gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

93:

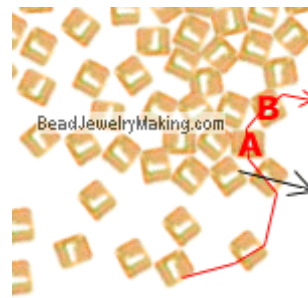

- Add two gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

94:

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

95:

- Add two gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

96:

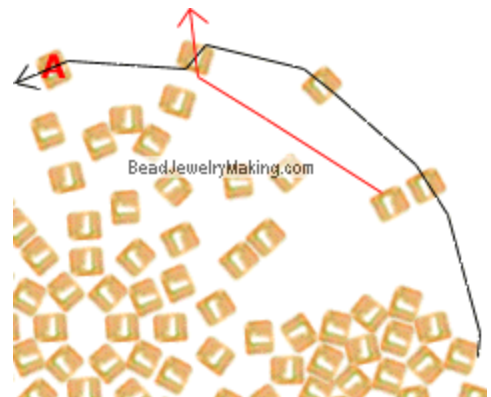

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

97:

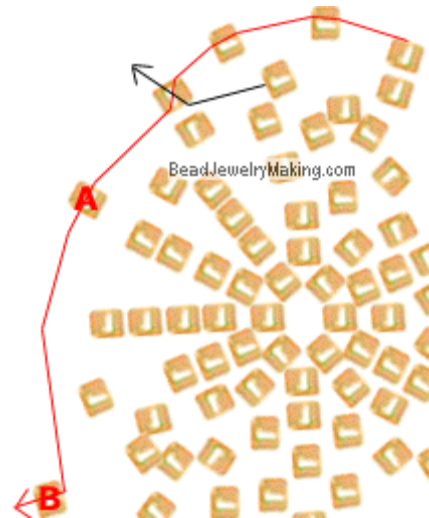

- Add three gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:

98:

- Add three gold beads on the right (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

99:

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.
- You should have the belly of the seahorse almost done by now and here's how the bottom ring of beads should look like now:

Step Continue to:

100:

- Add three gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through three old beads marked **A**, **B** and **C**.

Step Continue to:

101:

- Add two gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through three old beads marked **A**, **B** and **C**.

Step Continue to:

102:

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to: (work this step in the opposite

103: direction - clockwise)

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through three old beads marked **A**, **B** and **C**.

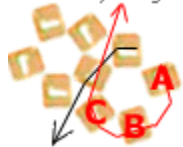

Step Continue to:

104:

- Add one gold bead to crisscross both strings through as shown.
- You should end up with this:

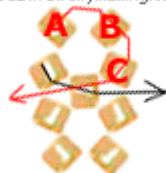

BeadJewelryMaking.com

which I will turn the direction

into:

BeadJewelryMaking.com

from next step onwards.

- Also you will not be using the upper four beads including those marked anymore (those are the beads on the bottom belly of the seahorse).
You will be using the bottom four beads which is the bottom backside of the seahorse.

Step Continue to: (the tail)

105:

- Add three gold beads on the left (red) string and crisscross the right (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

BeadJewelryMaking.com

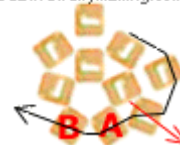

Step Continue to:

106:

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

BeadJewelryMaking.com

Step Continue to:

107:

- Add two gold beads on the right (red) string and crisscross the left (black) string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

108:

- Add one gold bead to crisscross both strings through, as shown.

Step Continue to: (work this step in the opposite
109: direction - anti-clockwise)

- Add three gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added.

Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to: (still working in anti-clockwise
110: direction)

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added.

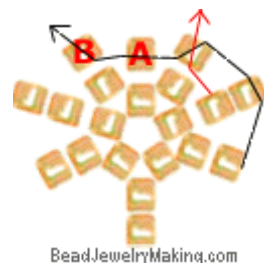

Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to: (still working in anti-clockwise
111: direction)

- Add two gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added.

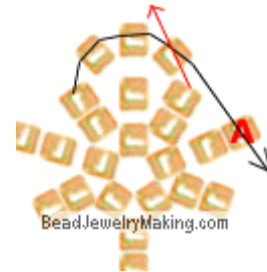

Continue to pass the black string (the one you used to add new beads on this step)

through two old beads marked **A** and **B**.

Step 112: Continue to: (go back to beading clockwise)

- Add three gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.
- Now you should have something like this:

Step 113: Continue to:

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 114: Continue to:

- Add two gold beads on the right (black) string and crisscross the left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step 115: Continue to:

- Add one gold bead to crisscross both strings through.
- Now you should have this:

Step 116: Continue to: (work this step in the opposite direction - anti-clockwise)

- Add three gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 117: Continue to: (still working in anti-clockwise direction)

- Add two gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

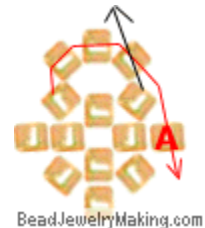

Step 118: Continue to: (still working in anti-clockwise direction)

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step 119: Continue to: (go back to beading clockwise)

- Add three gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.
- If you realize it, you will be repeating step 112 onwards again.

Step Continue to:

120:

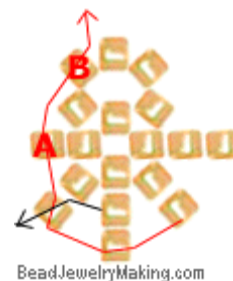

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:

121:

- Add two gold beads on the right (red) string and crisscross the left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:

122:

- Add one gold bead to crisscross both strings through.
- Now you should have this: (just like in step 115)

Step Continue to: (work this step in the opposite direction - anti-clockwise)

123:

- Add three gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to: (still working in anti-clockwise direction)

124:

- Add two gold beads on the left (red) string and crisscross the right (black) string

through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step)

through one old bead marked **A**.

Step 125: Continue to: (still working in anti-clockwise direction)

- Add two gold beads on the bottom (black) string and crisscross the top (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.
- After this, repeat exactly step 112 to step 122.

Step 126: Continue to: (work this step in the opposite direction - anti-clockwise)

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 127: Continue to: (still working in anti-clockwise direction)

- Add two gold beads on the left (red) string and crisscross the right (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 128: Continue to:

- Add one gold bead to crisscross both strings through.

Step 129: Continue to: (working in anti-clockwise direction)

- Add three gold beads on the bottom right (red) string and crisscross the top left (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 130: Continue to:

- Add two gold beads on the right (black) string and crisscross the left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 131: Continue to:

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step 132: Continue to:

- Add one gold bead to crisscross both strings through.
- Now you should have this:

BeadJewelryMaking.com

And your seahorse's tail should be curling frontward now.

Step 133: Continue to:

- Add three gold beads on the left (red) string and crisscross the right (black) string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 134: Continue to: (work in the opposite direction)

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 135: Continue to:

- Add two gold beads on the top right (black) string and crisscross the bottom left (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step 136: Continue to:

- Add one gold bead to crisscross both strings through.
- Now you should have this:

But it's facing upwards towards the belly of the seahorse.

- After this repeat [step 116 to step 117](#) exactly once.

Step 137: Continue to: (work in the opposite direction)

- Add two gold beads on the top (black) string and crisscross the bottom (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step)

through two old beads marked **A** and **B**.

Step Continue to:

138:

- Add one gold bead to crisscross both strings through.
- Now you should have this:

BeadJewelryMaking.com

This should now be facing into the tail (backwards). The whole tail is in a curl right now.

BeadJewelryMaking.com

Step Continue to:

139:

- Add three gold beads on the left (red) string and crisscross the right (black) string through the last bead added.

Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

BeadJewelryMaking.com

Step Continue to: (now work in the opposite direction)

140:

- Add one gold bead on the bottom (red) string and crisscross the top (black) string through the bead added.

Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

BeadJewelryMaking.com

Step Continue to:

141:

- Add one gold bead to crisscross both strings through.
- Pass the strings through the two loose old beads at the side and when the two ends meets, tie off with a dead knot, loop the remainder string back through the piece (no specific order) to make sure the know don't

BeadJewelryMaking.com

come loose.

Step 142: Crown: (cut a new piece of string, around 6 inches long or you can use wire too)

Note: the five lighter colored bead circle of five is the old bead circle on the very top of the seahorse's head, which you will be using to pass strings through.

- Add one gold bead at the middle of the string (marked by the red dot) add one more new bead through both string in the same direction (do not crisscross). Continue to pass the left (black) string through one old bead on it's left marked **A**. Continue to pass the right (red) string through one old bead on it's right marked **A**.

Step 143: Continue to: (work on one side at a time)

- On the left black string, add two gold beads and pass the same string back up through the first bead added. Continue to pass same string further up through one old bead on the head marked **A**.
- On the right red string, add two gold beads and pass the same string back up through the first bead added. Continue to pass same string further up through one old bead on the head marked **A**.

Step 144: Continue to: (work on one side at a time)

- On the left black string, add two gold beads and pass the same string back down through the first bead added. Continue to pass same string further down through one old bead on the head marked **A**.

- On the right red string, add two gold beads and pass the same string back down through the first bead added. Tie off and pass the excess strings back through the piece.

Step 145: Nose: (cut a new piece of string, around 10 centimetre long)

- With the seahorse facing you, note the five beads that's marked with red dots, that's where you continue to bead the nose or snout of the seahorse.
- Pass the new string through the lower bead marked with the red dot (with arrows exiting to show the string).

Step 146: Continue to:

- Add three gold beads on the left (black) string and crisscross the right (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 147: Continue to:

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step 148: Continue to:

- Add two gold beads on the right (black) string and crisscross the left (red) string through the last bead added. Continue to pass the black string (the one you used to add new beads on this step)

through one old bead marked **A**.

Step Continue to:
149:

- Add two gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through two old beads marked **A** and **B**.

Step Continue to:
150:

- Add one gold bead to crisscross both strings through.

Step Continue to:
151:

- Add three gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:
152:

- Add two gold beads on the left (black) string and crisscross the right (red) string through the last bead added.
Continue to pass the black string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:
153:

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step)

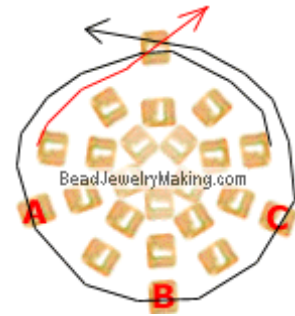

through three old beads marked **A**, **B** and **C**.

Step Continue to:

154:

- Add one gold bead to crisscross both strings through.
- Continue to pass the black string through three old beads marked **A**, **B**, **C** and tie off, pass the excess strings back through the pieces to make the knot a more secure knot.

Step Top back fins:

155:

- This is the back of the seahorse's head. Note the six old beads marked with red and black dots, these old beads will be used in the beading of the top back fins.
- Cut a piece of string around four inches long. Pass the string through the three old beads on the left (with black dots) as shown.

Step Continue to:

156:

- Add two gold beads on the bottom (red) string and crisscross the top (black) string through the last bead added.

Step Continue to:

157:

- Add four gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added. Continue to pass the red string (the one you used to add new beads on this step) through one old bead marked **A**.

Step Continue to:

158:

- Add three gold beads on the left (black) string. Continue to pass this string (the one you

used to add new beads on this step)
through five old beads marked **A**, **B**, **C**, **D**
and **E**. (**A** and **B** being the two old beads
from step 156) (**C**, **D** and **E** being the three
old beads on the back of the seahorse's
head marked with red dots in step 155)

- Tie off and pass the excess thread back through the piece.

Step 159: Lower back fins:

- Just slightly below where you just beaded the upper back fins, find the two old beads on the back marked by the red dots (a little like the spine of the seahorse).
- Cut a piece of new string, around four inches long.
Pass it through both of the two marked beads as shown.

Step 160: Continue to:

- Add four gold beads on the top (red) string and crisscross the bottom (black) string through the last bead added.

Step 161: Continue to: (in opposite direction)

- Add four gold beads on the right (red) string and crisscross the left (black) string through the last bead added.
Continue to pass the red string (the one you used to add new beads on this step) through one old bead from step 160 marked **A**.

Step 162: Continue to:

- Add three gold beads on the bottom (black) string and tie off! As usual pass the excess back through the piece.
- Now you can add jump ring at the top of

the seahorse's head to hang as a charm.
